# Put your truck on the map

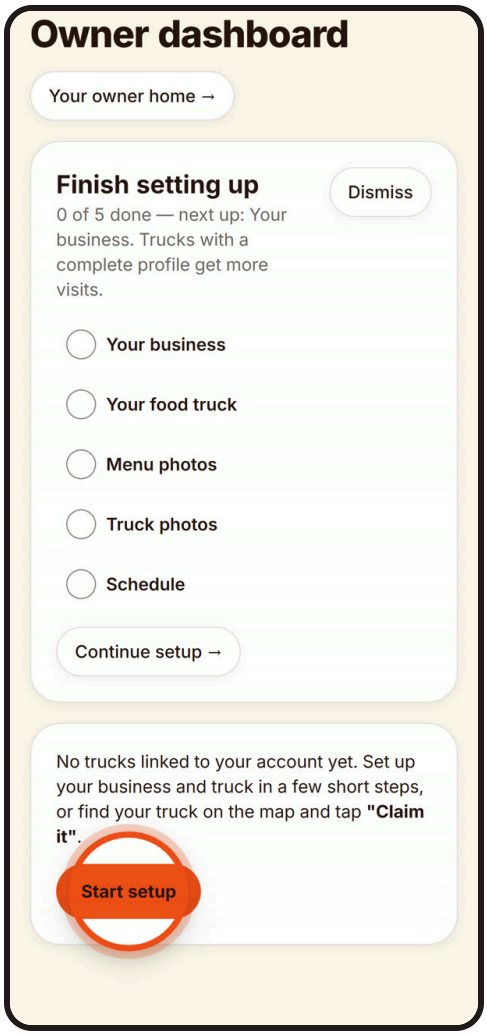

Set up your business and submit your truck for approval. Only two steps are required; the rest can wait.

> 💡 This guide follows the video step by step. Each picture shows the exact screen, with an orange circle on the spot to tap.

STEP 1

## Open app.foodtruckqc.com/owner → Start setup

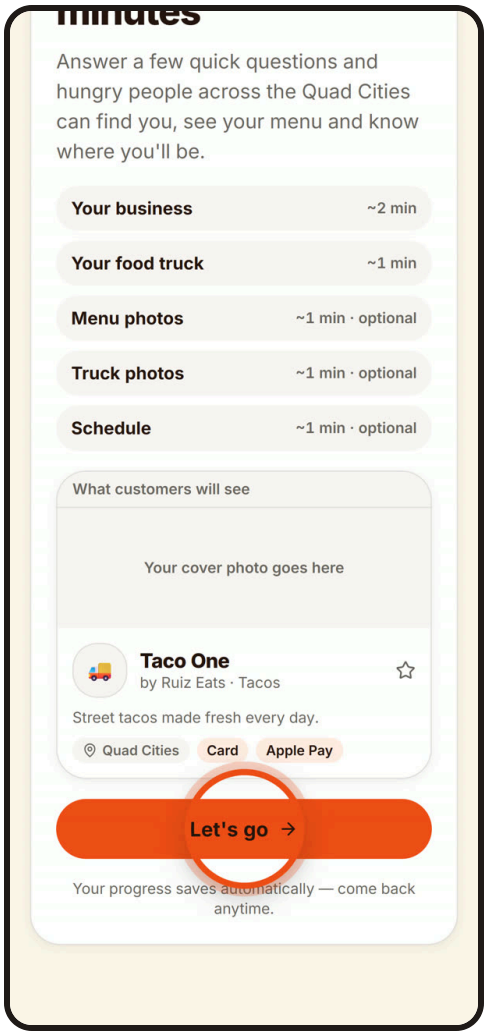

Now let's add your truck. Open app.foodtruckqc.com/owner. Because you're signed in, you'll see a card that says No trucks linked to your account yet. Tap the orange button, Start setup.

STEP 2

## Tap Let's go

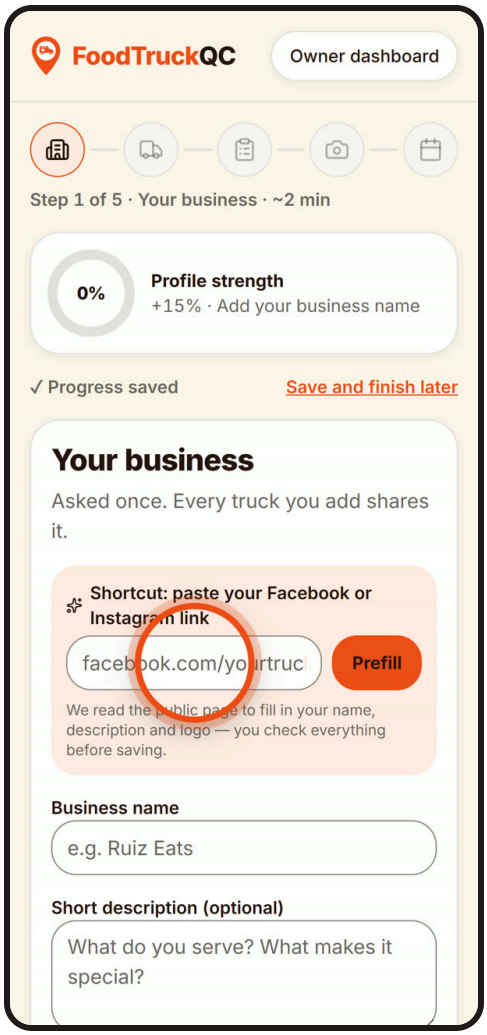

This page tells you what's coming: your business, your truck, menu photos, truck photos and schedule. Only the first two are required. Everything saves automatically, so you can stop and come back any time. Tap Let's go.

STEP 3

## Step 1: Your business — Facebook/Instagram shortcut

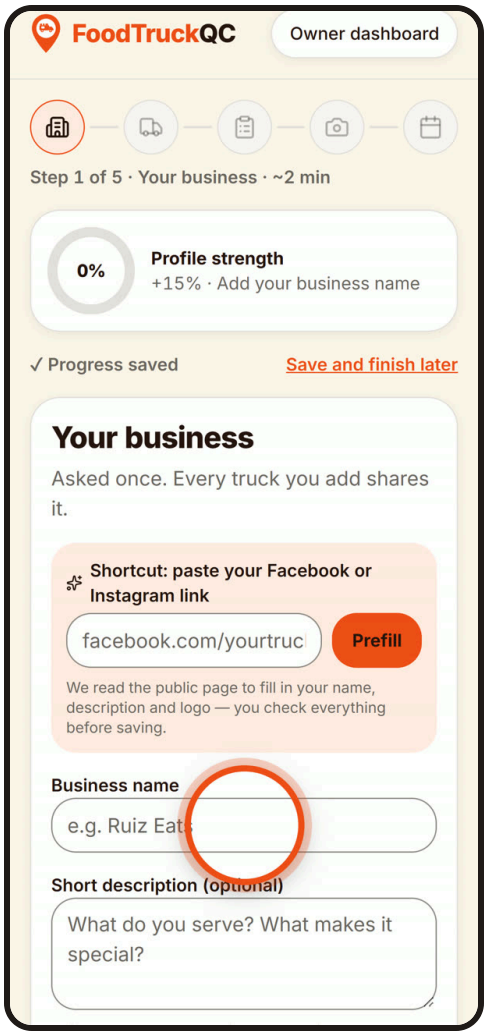

Step one is about your business. If your truck has a Facebook or Instagram page, here's a shortcut: paste its link in this box and tap Prefill. We'll read your public page and fill in your name, description and logo for you. You check everything before saving.

STEP 4

## Business name, description and logo

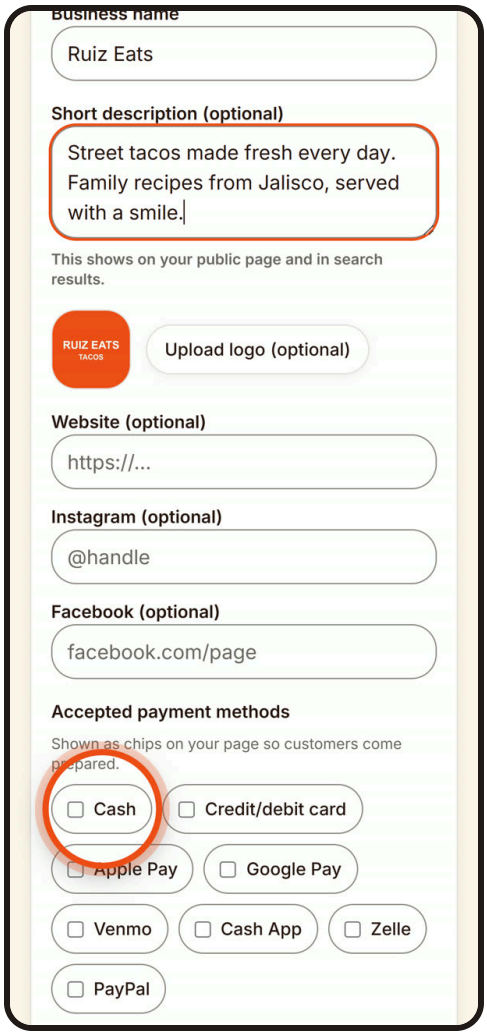

If you don't use the shortcut, no problem. Type your business name — this one is required. Below it, write a short description: what you serve and what makes it special. Customers see this on your page. Then, if you have a logo, tap Upload logo and pick it from your photos.

STEP 5

## Accepted payment methods

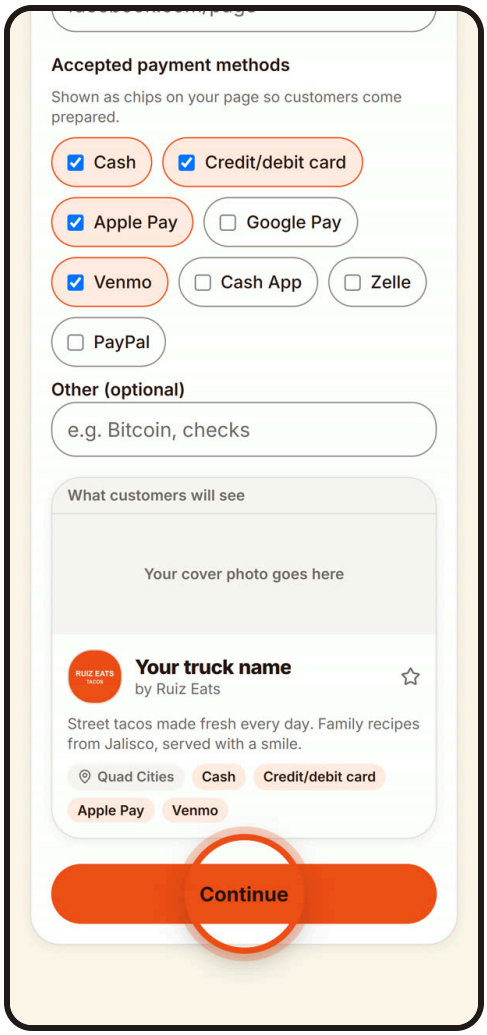

Scroll down to Accepted payment methods. Tap every way you accept money: Cash, Credit or debit card, Apple Pay, Venmo, and so on. Tapped ones turn orange. This shows on your page so customers come prepared.

STEP 6

## Tap Continue

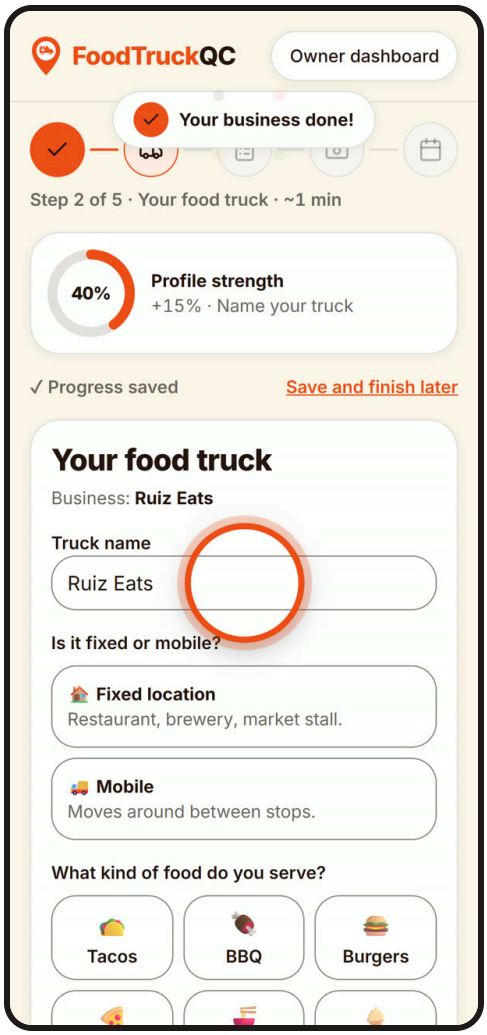

Notice the preview card at the bottom — that's how your page will look. When you're happy, tap the big orange Continue button. You'll see a little celebration: Your business, done!

STEP 7

## Step 2: Your food truck — name

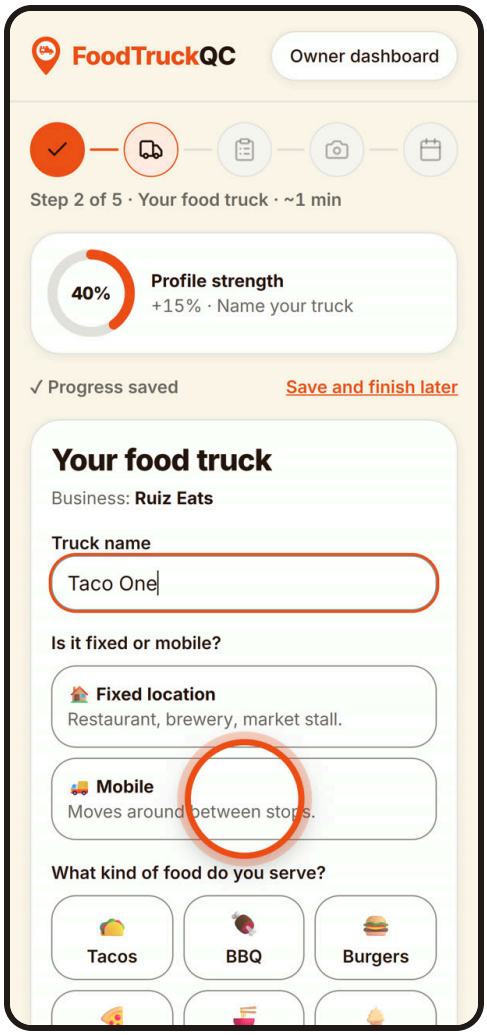

Step two: your truck. The truck name starts as your business name. Change it if your truck has its own name.

STEP 8

## Fixed location or Mobile?

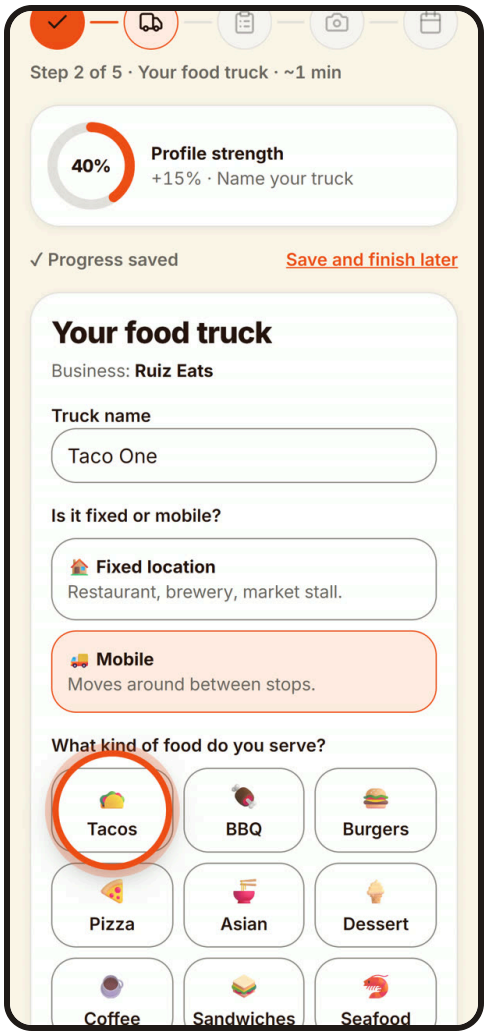

Now the most important question: is your truck fixed or mobile? Tap Mobile if you move between stops — most trucks do. Tap Fixed location if you're always at the same place, like a restaurant, a brewery or a market stall.

STEP 9

## What kind of food do you serve?

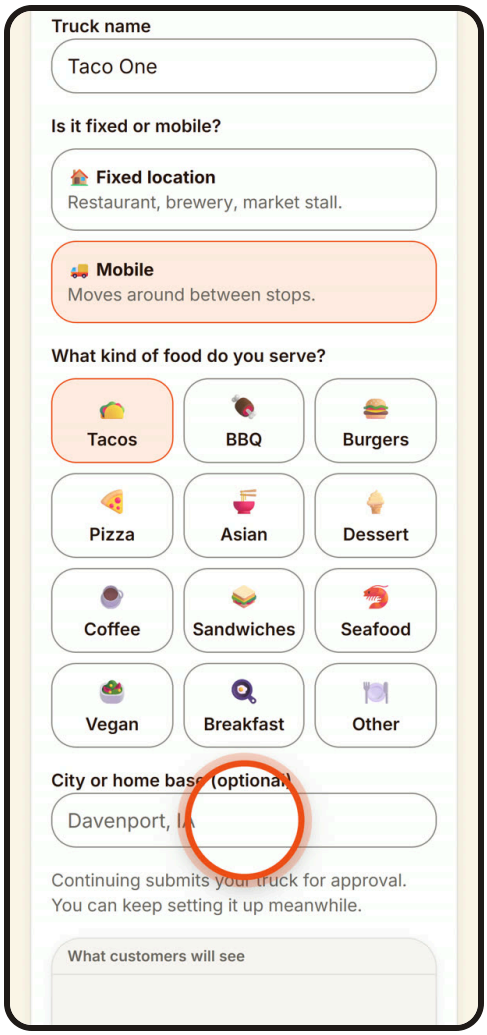

Tap the kind of food you serve. If it's not on the list, tap Other and type it in.

STEP 10

## City or home base

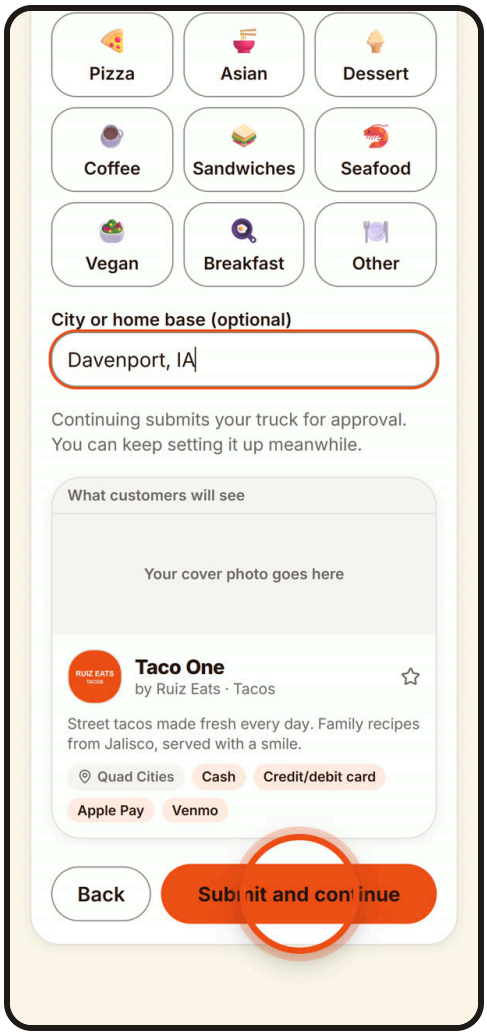

Last box: your city or home base, for example Davenport, IA. If you chose Fixed location, type the full street address here and tap the suggestion that matches.

STEP 11

## Tap Submit and continue

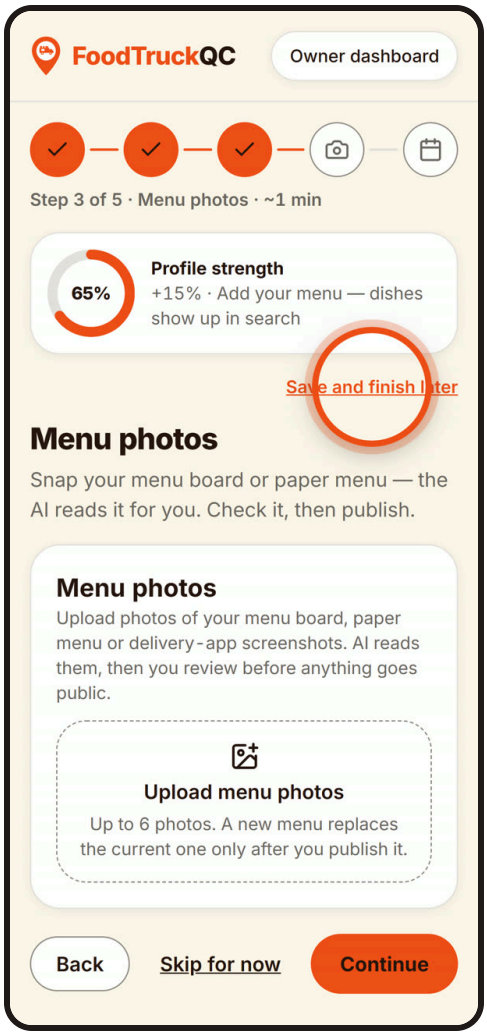

Tap Submit and continue. Your truck is now sent to the FoodTruckQC team for a quick review. You'll see a tracker: Submitted, In review, Approved, Live. You'll get an email when it's approved. Tap Continue.

STEP 12

## Optional steps: Skip for now

The next three steps — menu, photos and schedule — are optional. We cover each one in its own video. You can tap Skip for now on each, or tap Save and finish later at the top at any time.

STEP 13

## You're live soon — Open owner dashboard

That's it! This screen shows what's done and what's still missing. Tap Open owner dashboard to see your new home base.
