Go live and edit your profile

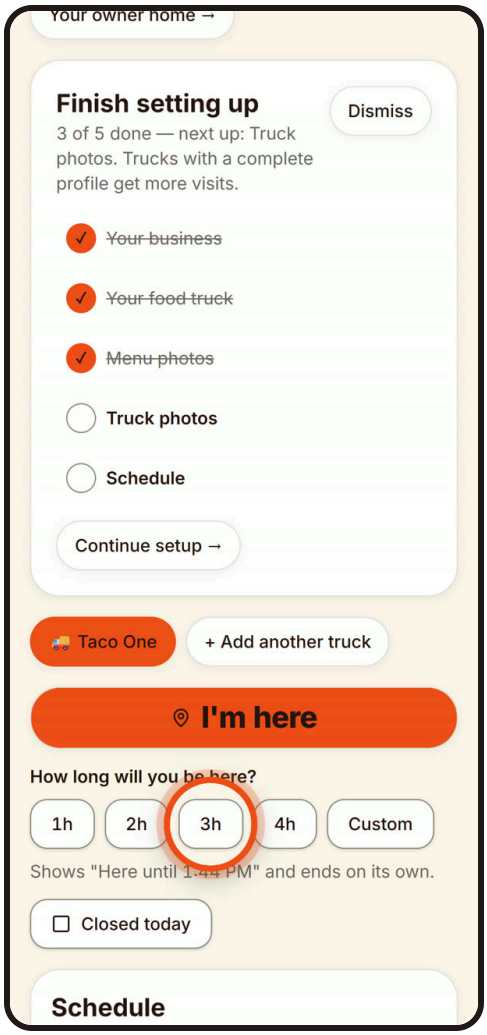

Use the I'm here button when you open, extend or end your check-in, and keep your business and truck details up to date.

💡 This guide follows the video step by step. Each picture shows the exact screen, with an orange circle on the spot to tap.

STEP 1

Pick how long → tap I'm here

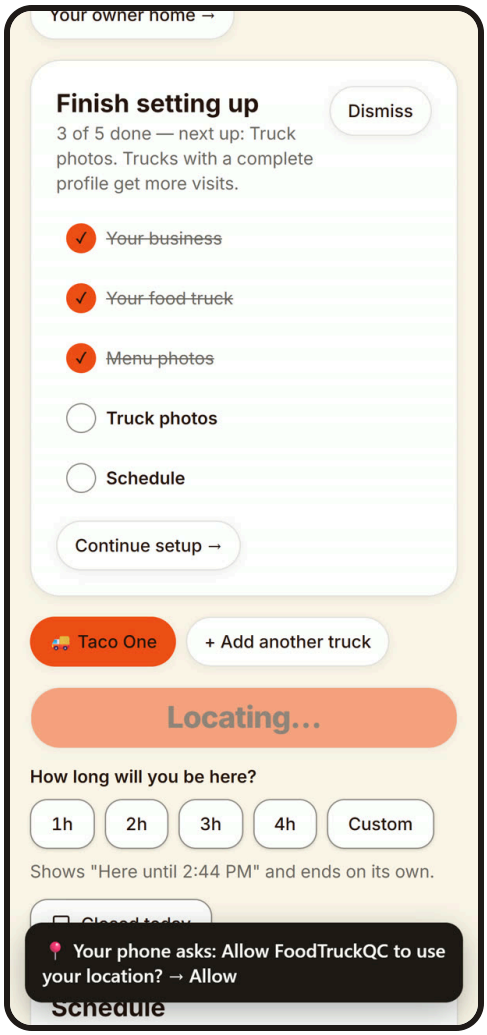

This is the most useful button in the app. When you park and open, tap I'm here. First choose how long you'll be there: 1, 2, 3 or 4 hours, or Custom. Then tap the big orange button.

STEP 2

Allow location

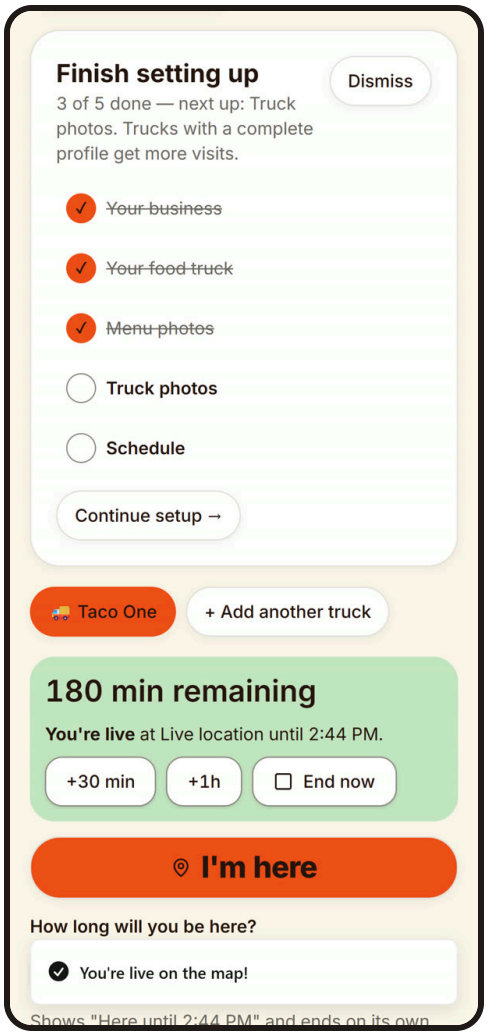

Your phone asks to use your location. Tap Allow — that's how we put you on the map exactly where you are.

STEP 3

You're live — extend or End now

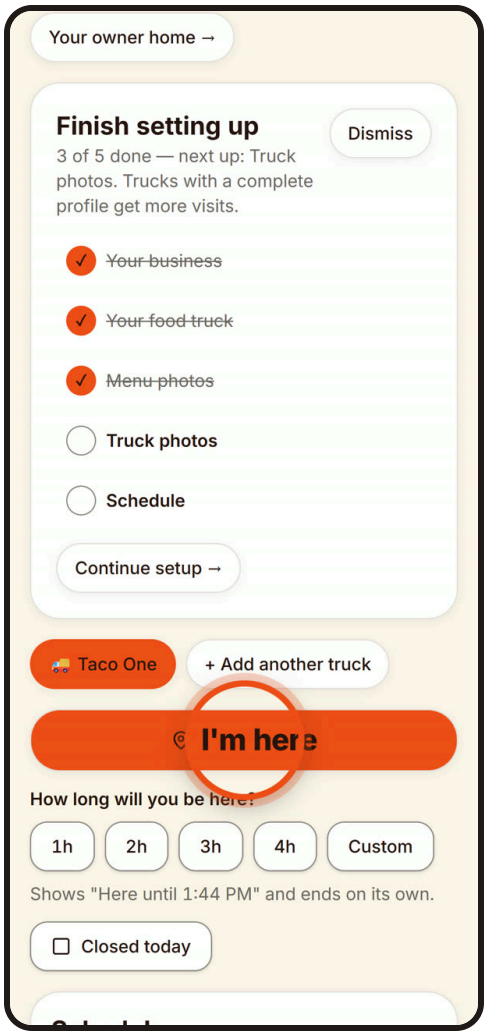

You're live. Everyone looking at the map now sees your truck as open. Staying longer? Tap plus 30 minutes or plus 1 hour. Closing early? Tap End now.

STEP 4

No GPS? Type the address → Find → Check in at pin

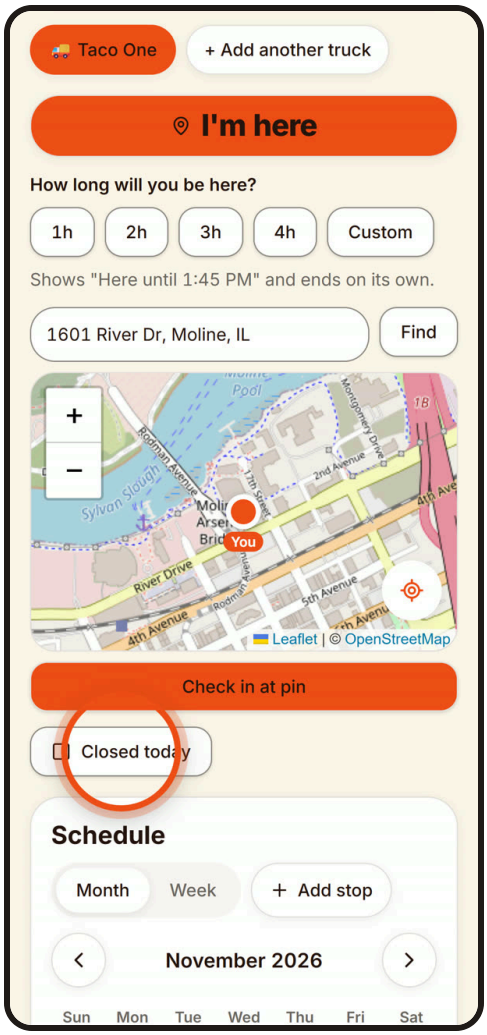

If your phone can't find your location, type the address, tap Find, and then Check in at pin.

STEP 5

Closed today

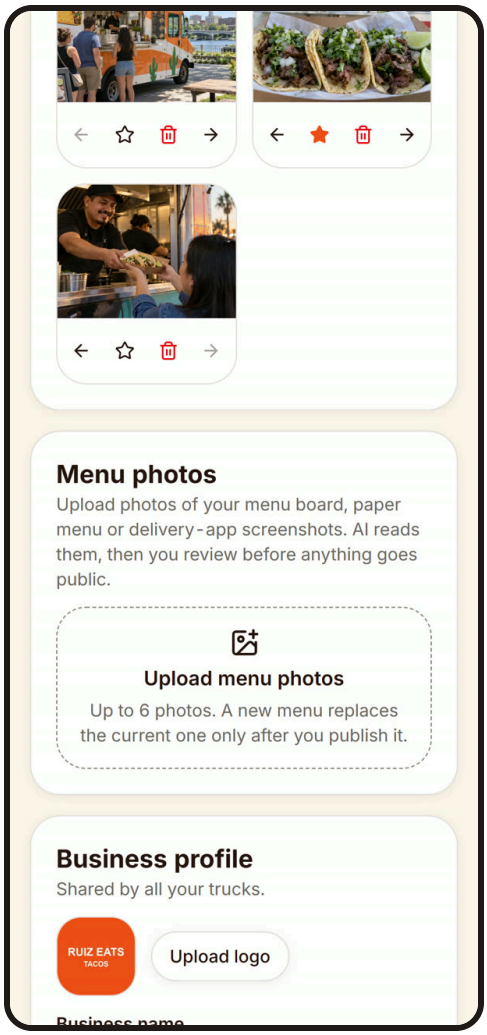

Rain day? Tap Closed today and all of today's stops are hidden from the map.

STEP 6

Business profile → Save business profile

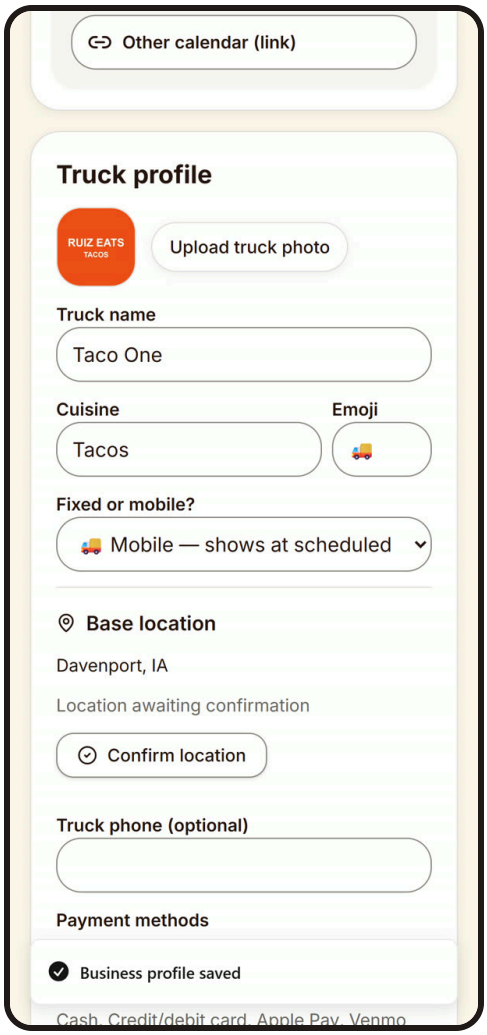

To change your business details, scroll to the bottom of the dashboard, to Business profile. Change anything you like — name, description, logo, social links or payment methods — and tap Save business profile.

STEP 7

Truck profile → Save truck

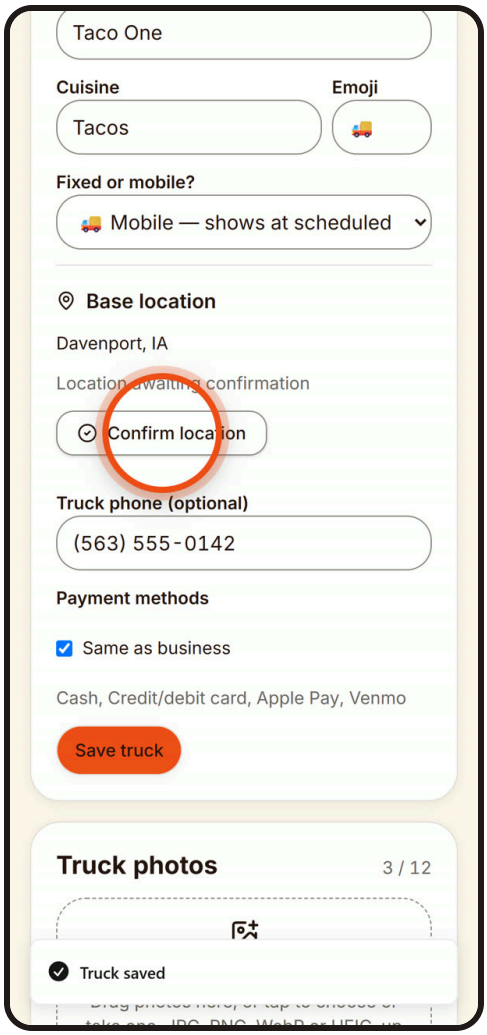

Just above it is Truck profile. Here you can rename the truck, change the cuisine, switch between mobile and fixed, add the truck's phone number, and choose different payment methods for this truck. Always finish with Save truck.

STEP 8

Fixed location → Confirm location

If your truck is a fixed location, type the full address and save. Then tap Confirm location so we know the pin is right.

STEP 9

Profile & settings → Owner home → Open public page

Finally, tap your initials at the top right and choose Profile and settings. Your Owner home shows how complete your profile is, and a button to open your public page — the page your customers see. Share that link on Facebook and Instagram.
