I'm here and stops by voice

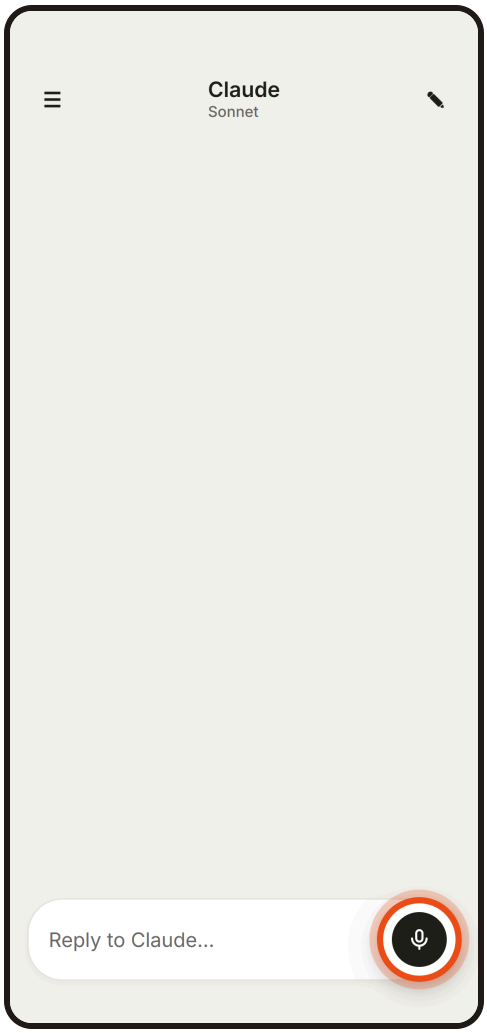

Go live, add this week's stops and check out just by telling your AI. Everything shows on the map the same second.

> 💡 This guide follows the video step by step. Each picture shows the exact screen, with an orange circle on the spot to tap.

STEP 1

Parked and open? Tap the mic

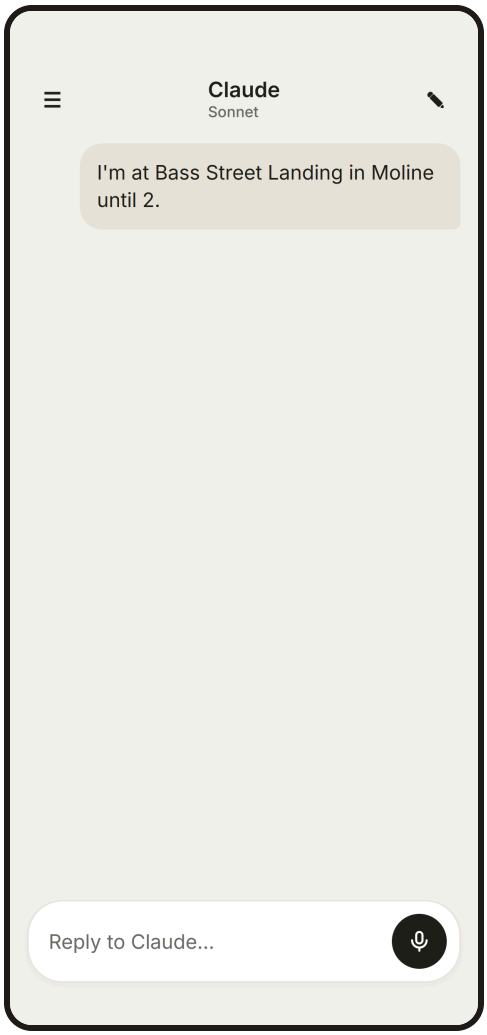

You just parked and opened the window. Tap the mic and say:

STEP 2

“I'm at Bass Street Landing in Moline until 2.”

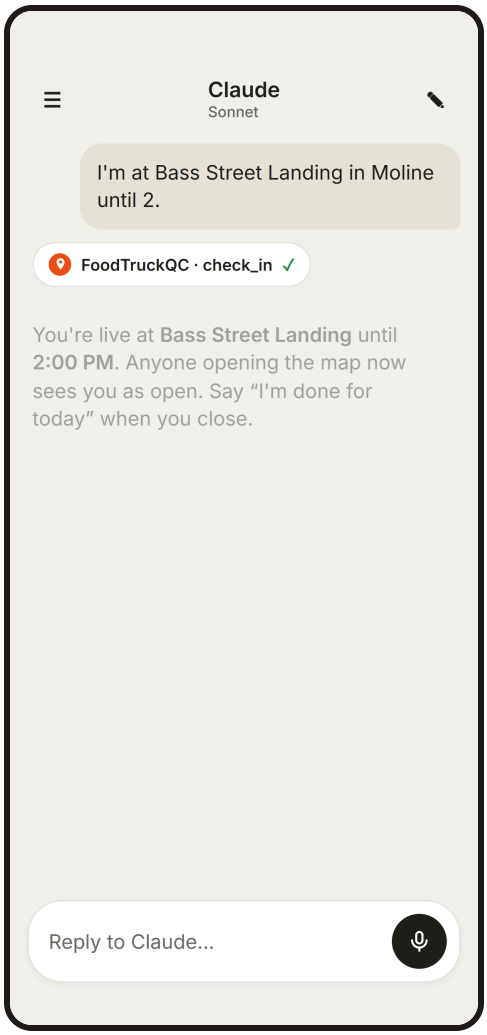

"I'm at Bass Street Landing in Moline until two."

STEP 3

Checked in: your truck shows as open on the map

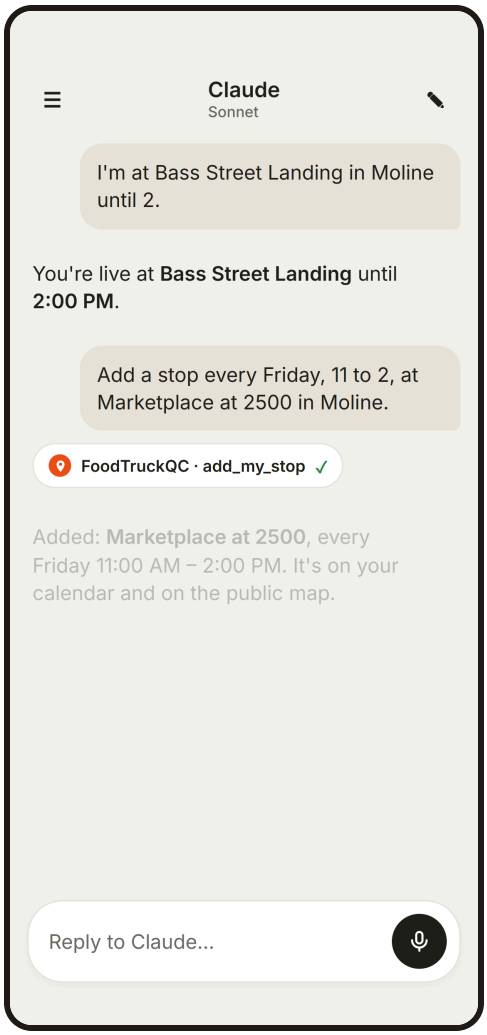

Your AI checks you in. Everyone looking at the map right now sees your truck as open, with the right end time.

STEP 4

“Add a stop every Friday 11 to 2 at Marketplace at 2500, Moline.”

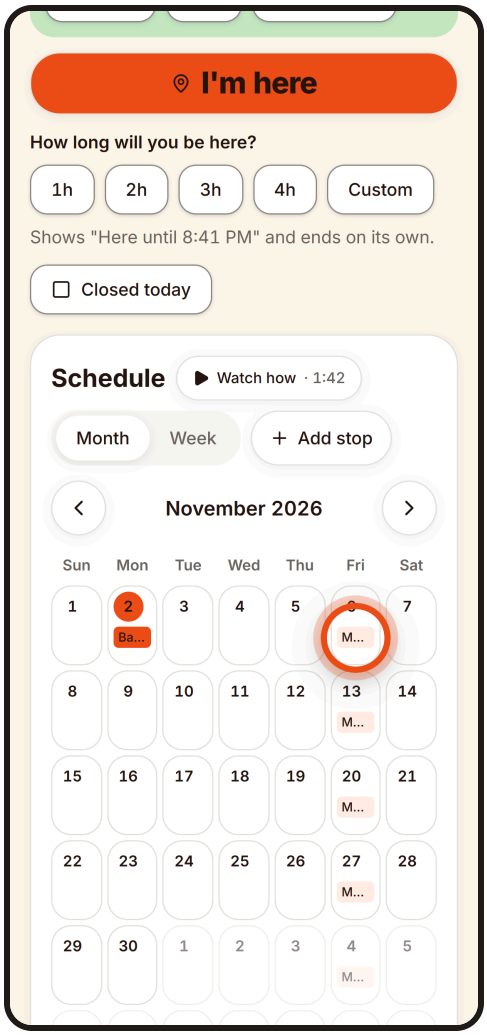

Planning ahead? "Add a stop every Friday, eleven to two, at Marketplace at 2500 in Moline." That's on your calendar and on the public map, every week.

STEP 5

Owner dashboard → Schedule

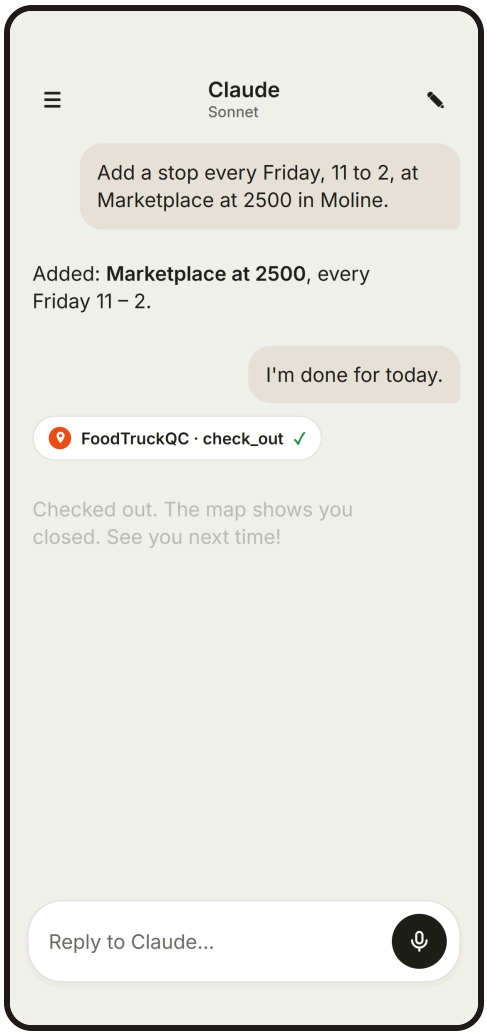

Here it is on your schedule, same as if you'd tapped it in.

STEP 6

“I'm done for today.”

Closing early? "I'm done for today." The map shows you closed, right away.

STEP 7

Also by voice: phone, description, what's missing, stops…

Your AI can also change your phone number, your description, or tell you what's still missing on your profile. Anything you'd do on the dashboard, you can now just say.
