Add truck photos

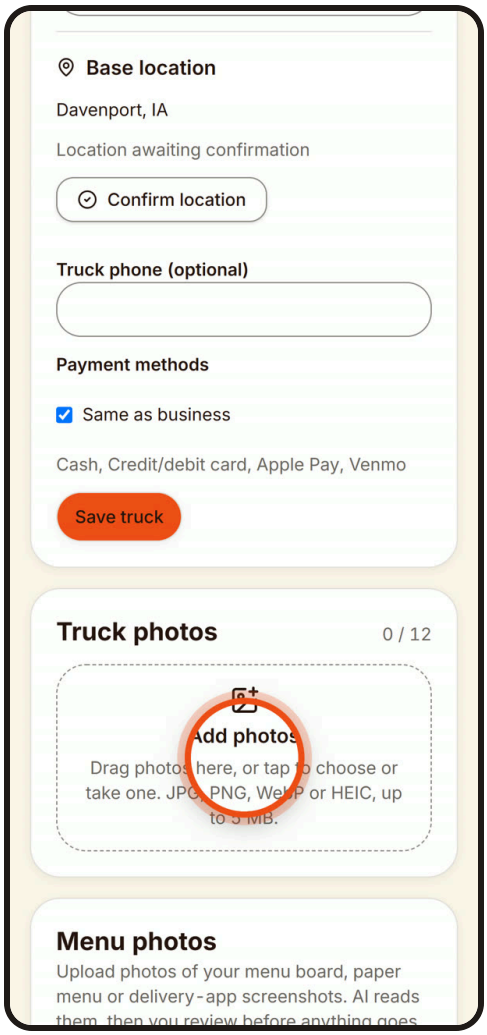

Upload photos of your truck and food, pick the cover, and set the small picture shown next to your name.

💡 This guide follows the video step by step. Each picture shows the exact screen, with an orange circle on the spot to tap.

STEP 1

Owner dashboard → Truck photos → Add photos

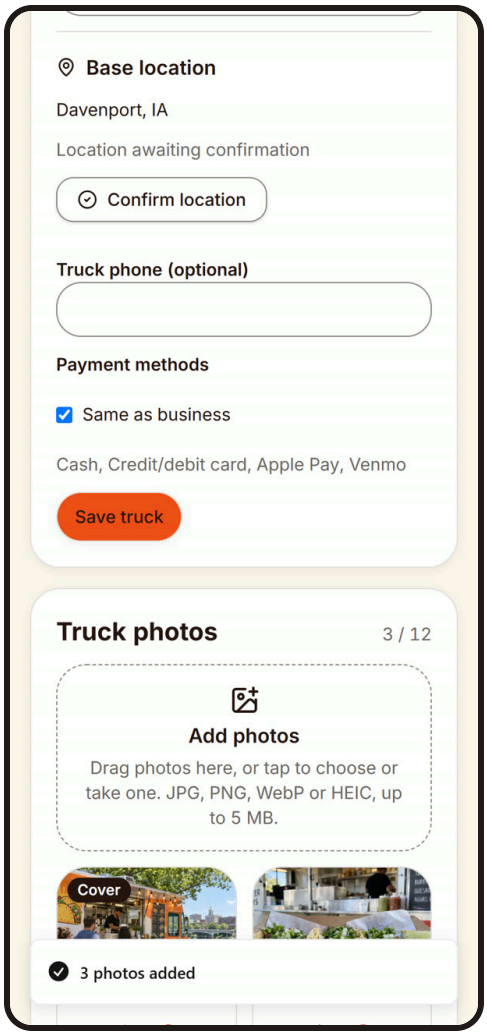

Trucks with photos get a lot more visits. On your dashboard, scroll to Truck photos. Tap the dashed box that says Add photos.

STEP 2

Choose several photos at once

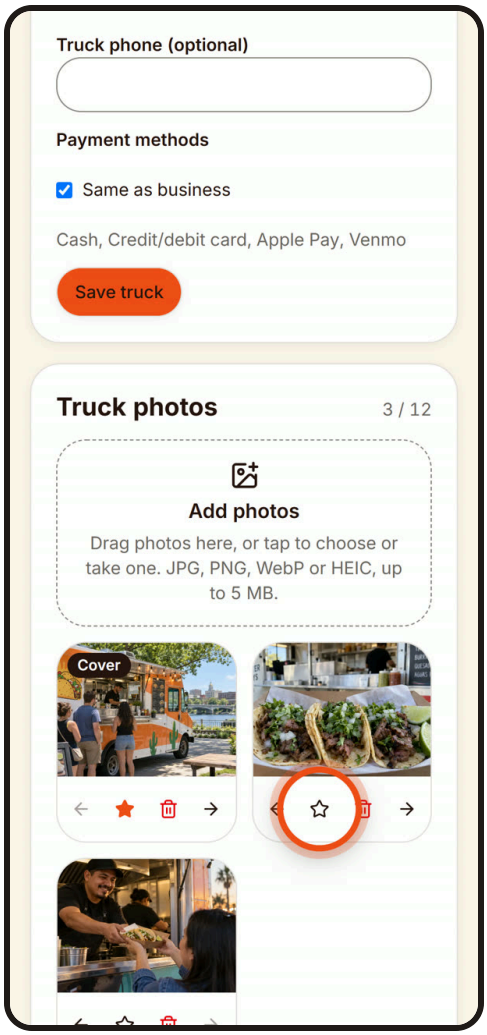

Pick a few photos: your truck from the front, your best dishes, your crew. You can select several at once. Wait until it says photos added.

STEP 3

Cover photo, order and delete

Your photos appear in a grid. The first one is your cover — the big picture on your page. To choose a different cover, tap the star under that photo. The arrows move a photo earlier or later. The trash can deletes it.

STEP 4

Truck profile → Upload truck photo → Save truck

There's also a small square picture used next to your name everywhere on the map. In the Truck profile card, tap Upload truck photo to set it, then tap Save truck.
