Your schedule: where you'll be

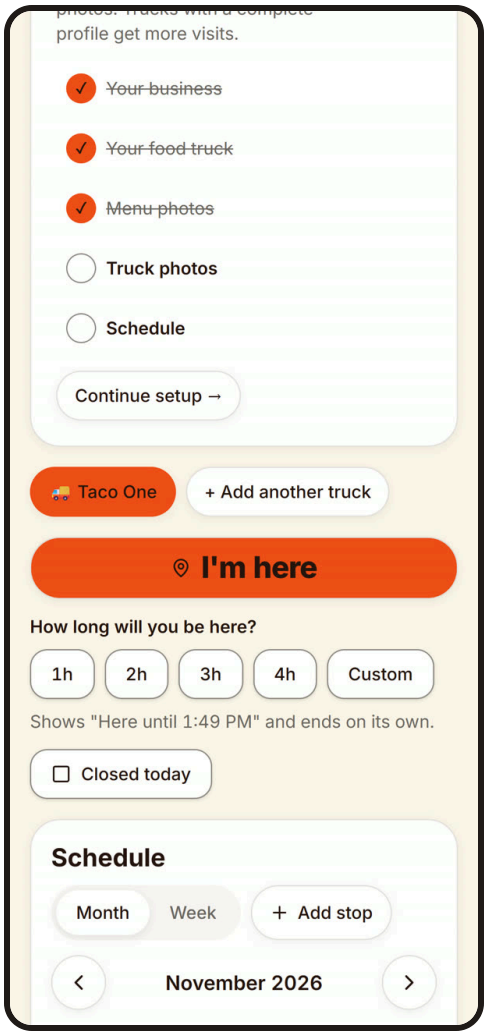

Add your stops to the calendar so customers know where to find you, set repeating stops, and connect a calendar if you keep one.

💡 This guide follows the video step by step. Each picture shows the exact screen, with an orange circle on the spot to tap.

STEP 1

Owner dashboard → Schedule

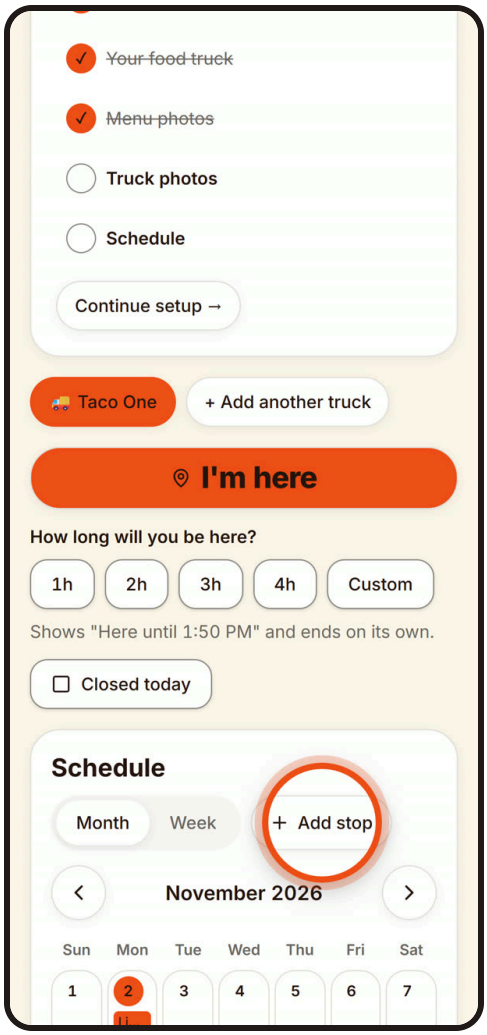

This is the part that brings customers: your schedule. On your dashboard, find the Schedule card. It's a calendar. Today has an orange circle.

STEP 2

Tap Add stop

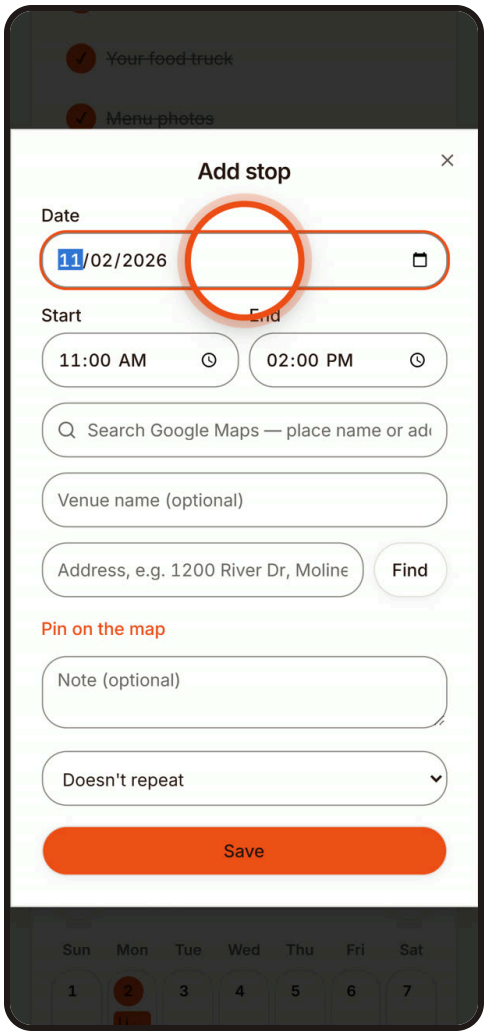

Tap Add stop — or just tap the day you want. A window opens.

STEP 3

Date, start and end time

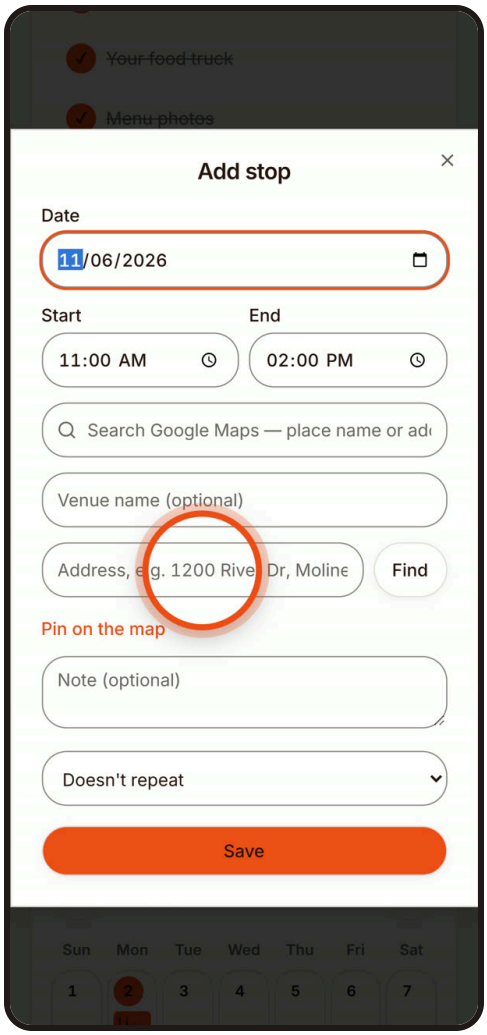

Check the date. Set your start time and your end time by tapping each box. Times are Central time.

STEP 4

Type the address → Find

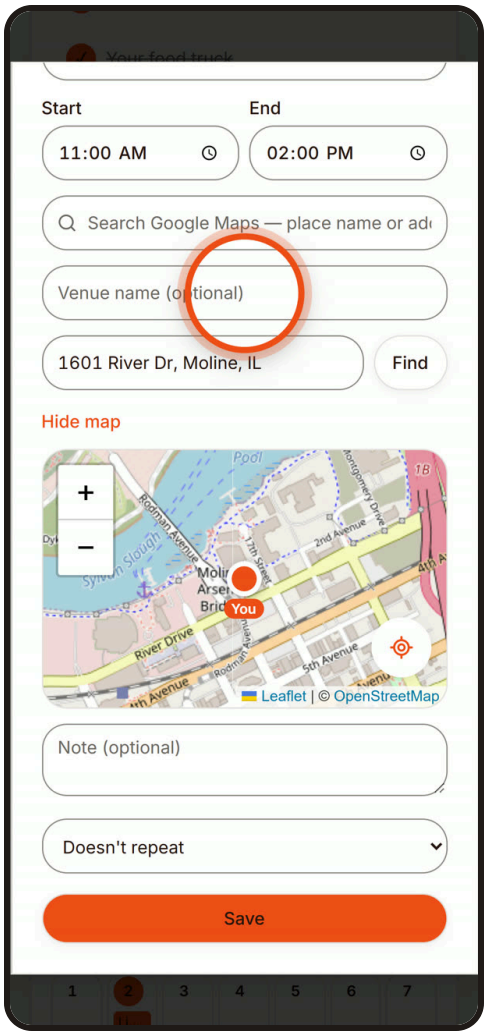

Now, where will you be? Type the street address in the Address box and tap Find. The app finds the exact spot and shows a map with a pin. If the pin is a little off, drag the map until the pin is right. You can also search by place name in the box above.

STEP 5

Venue name and note (optional)

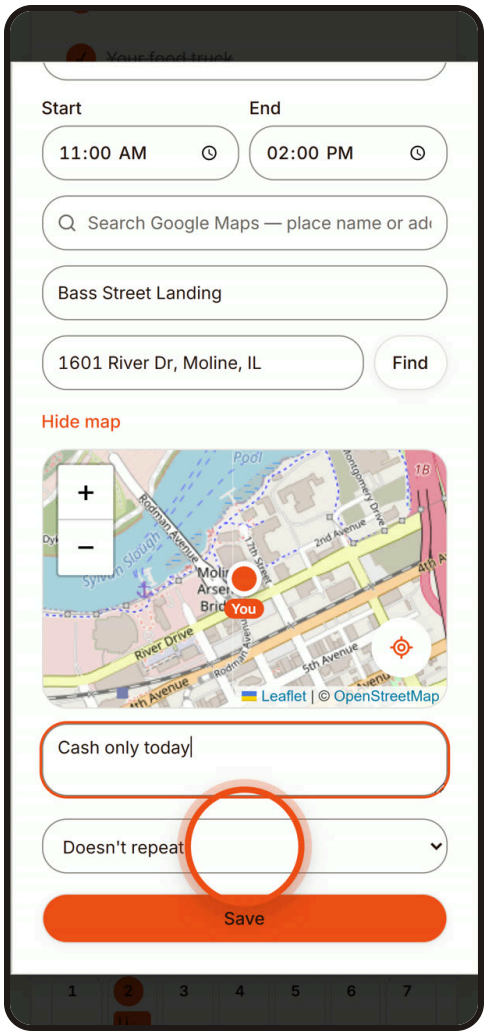

You can also type a venue name, like Bass Street Landing, and a note like Cash only today.

STEP 6

Repeat weekly and pick the days

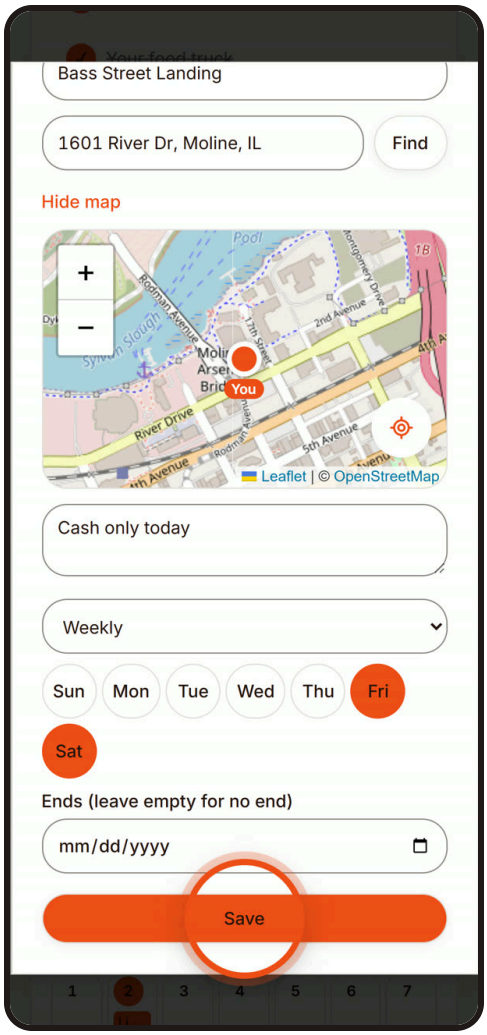

Do you go there every week? Tap the box that says Doesn't repeat and choose Weekly. Then tap the days of the week. Leave Ends empty if it goes on forever.

STEP 7

Tap Save

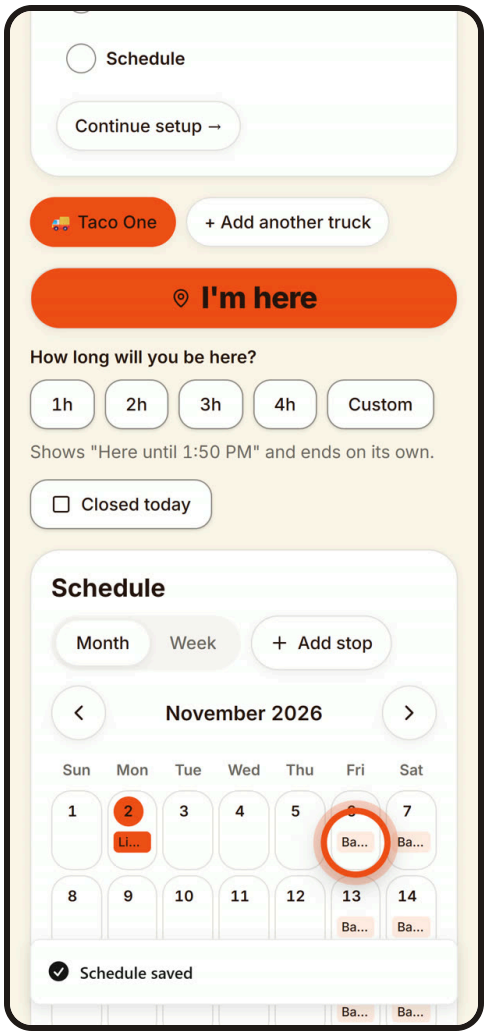

Tap Save. Your stop is on the calendar and on the public map for that day.

STEP 8

Edit, delete or skip a stop

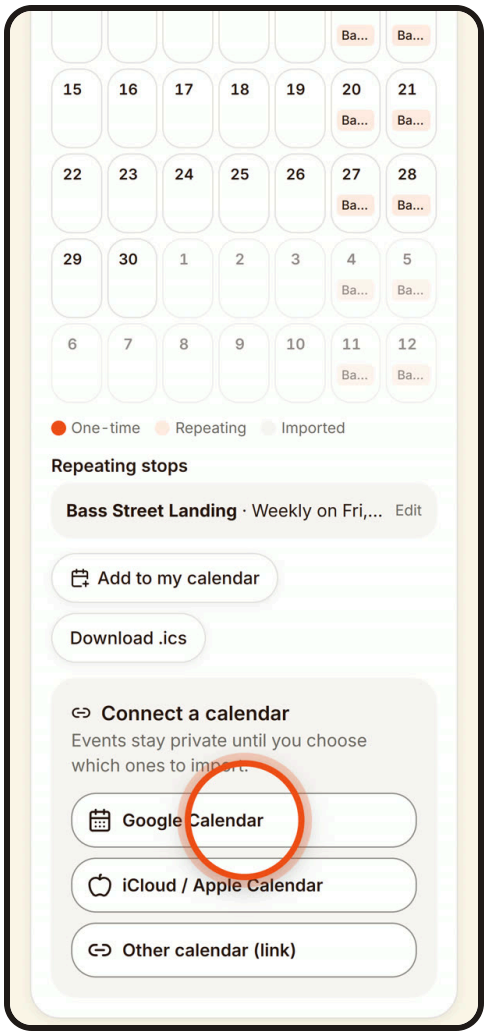

Plans change? Tap the stop on the calendar. You can change it, delete it, or — for a repeating stop — skip just this one date.

STEP 9

Connect a calendar (optional)

Already keep your schedule in Google Calendar? Scroll down to Connect a calendar and follow the three steps shown. Your events stay private until you tap Import on each one.

STEP 10

Owner home → The next 7 days

Your next seven days are always listed on your Owner home.
