Register your truck by voice

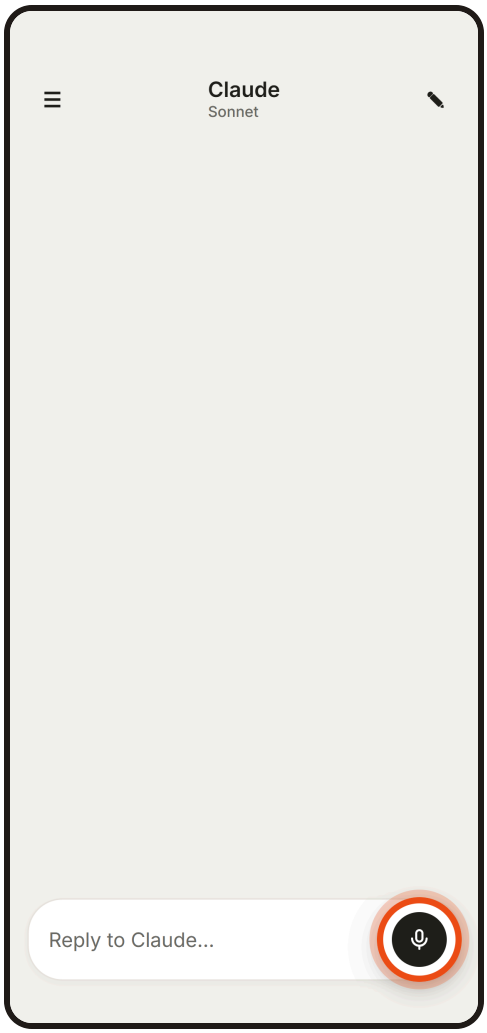

Tell your AI about your truck and it fills in the FoodTruckQC form for you. The truck goes to the team for the same quick review.

💡 This guide follows the video step by step. Each picture shows the exact screen, with an orange circle on the spot to tap.

STEP 1

Tap the microphone and talk

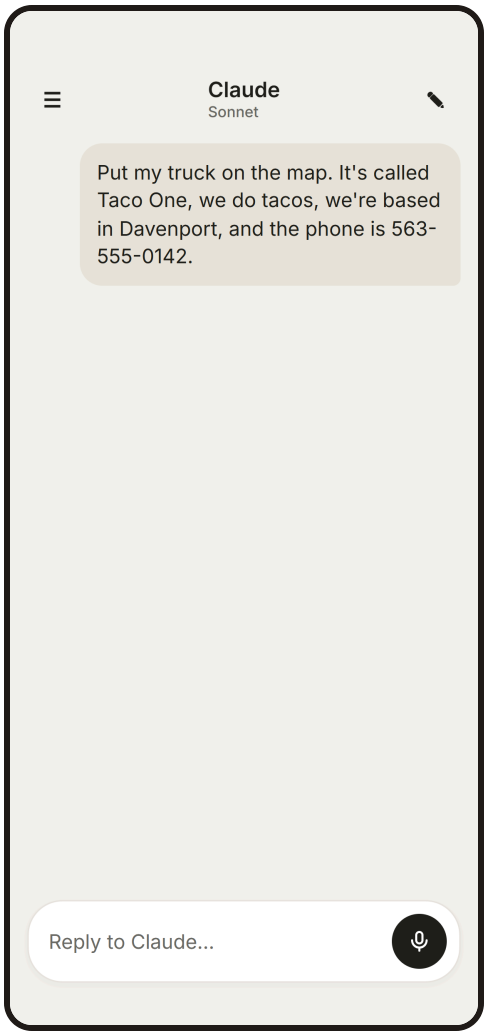

Open your AI, tap the microphone, and just talk, like you're telling a friend about your truck.

STEP 2

“Put my truck on the map. It's called Taco One, we do tacos, based in Davenport, phone 563-555-0142.”

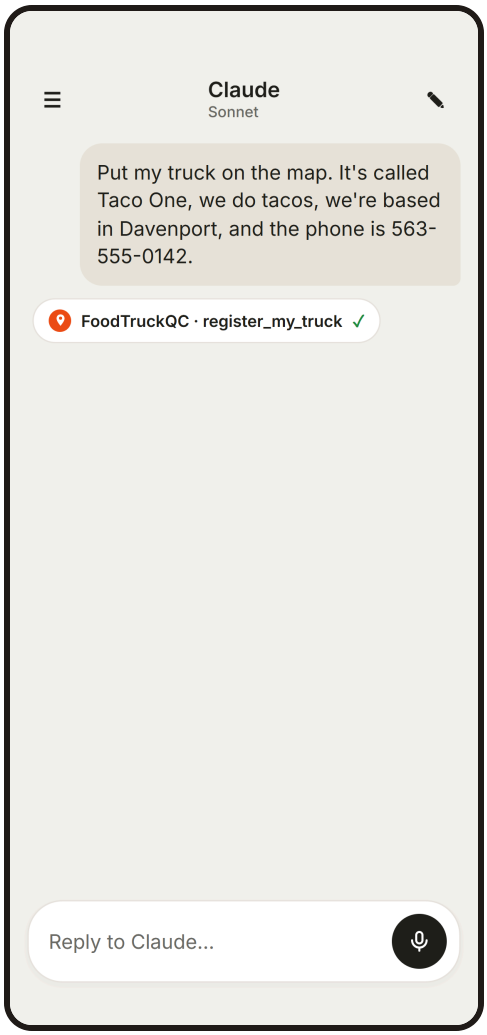

"Put my truck on the map. It's called Taco One, we do tacos, we're based in Davenport, and the phone is 5 6 3, 5 5 5, 0 1 4 2."

STEP 3

The FoodTruckQC chip = your AI filling the form

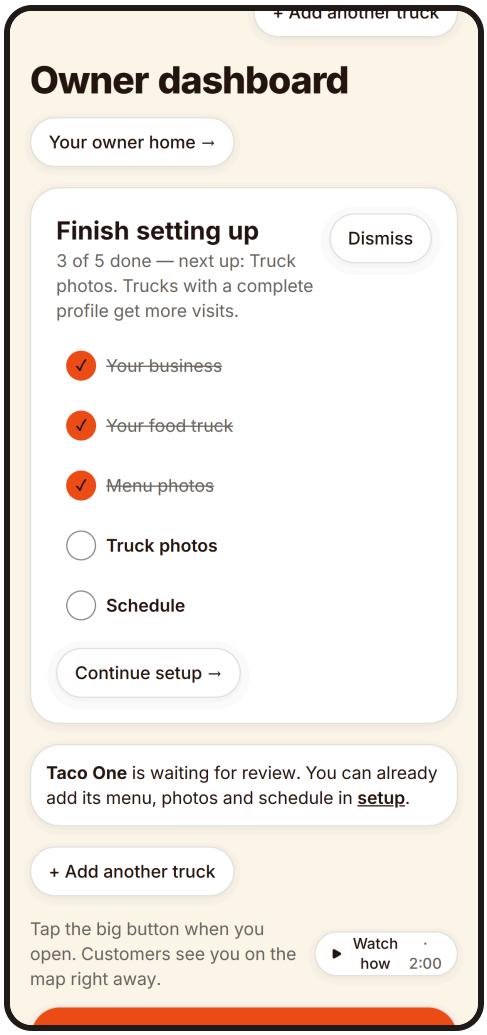

Watch the little FoodTruckQC chip: that's your AI filling in the form for you. It answers with your truck's page and says it's pending review.

STEP 4

Owner dashboard: the truck is waiting for review

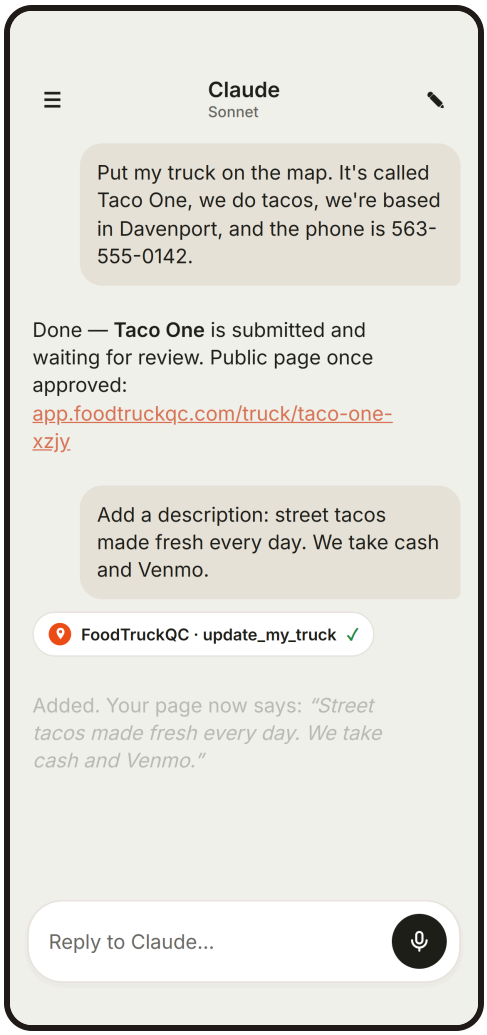

Open FoodTruckQC. There it is: Taco One, waiting for review, exactly like it would be if you had typed it all in.

STEP 5

“Add a description: street tacos made fresh every day. We take cash and Venmo.”

Want to add more? Just say it. "Add a description: street tacos made fresh every day. We take cash and Venmo." Done.

STEP 6

After approval: your truck is on the public map

Once the team approves it, usually within a day, your truck shows on the public map.
